PROFESSIONAL SUMMARY

High-Impact Business Analyst & Data Analytics Specialist at Razorpay with 1+ years of experience driving GMV growth, checkout funnel optimization, and data infrastructure across 15+ Tier-1 global and domestic enterprise accounts (\$500M+ global GMV & INR 2,000+ Cr domestic GMV). Proven track record of executing exploratory data analysis, writing complex SQL on large-scale schemas (PostgreSQL, GCP BigQuery), and building automated statistical anomaly detection systems (Z-score). Skilled in gateway optimization, ticket-size routing, executive dashboarding (Tableau, Power BI), and Python ETL automation.

PROFESSIONAL EXPERIENCE

Razorpay <i>Business Analyst</i>	October 2025 – Present <i>Bengaluru, Karnataka</i>
Global Enterprise Optimization (Meta & Airbnb): Led checkout funnel analytics, ticket-size gateway routing, and success rate optimization across \$500M+ annual GMV for Meta, driving a +15% Success Rate (SR) lift (58% to 73%) beating competing PGs by a 3% delta and capturing 50%+ volume share across 6-8 competing gateways. Domestic Market Leadership (Edelweiss MF & Swiggy): Managed portfolio performance analytics for 15+ Tier-1 enterprise accounts processing INR 2,000+ Cr annual GMV; established Edelweiss Mutual Fund as the #1 industry leader in Success Rate with a 5%+ SR delta over all competing payment methods. Advanced SQL & Big Data Querying: Authored complex SQL transformations (CTEs, window functions, aggregations) on GCP BigQuery, PostgreSQL, and MySQL databases to perform cohort, conversion funnel, and transaction trend analysis. Statistical Anomaly Modeling: Deployed Z-score statistical thresholding models across high-throughput data streams to identify multi-currency transaction discrepancies, reducing failure detection latency by 10x and safeguarding revenue controls. Executive Insights & Reporting: Designed interactive KPI dashboards in Tableau and Power BI, translating complex transactional data into actionable strategic readouts for senior leadership and client business reviews. Process Automation & Observability: Built automated Python (Pandas, NumPy, SciPy) ETL pipelines and integrated real-time Slack/PagerDuty alerting, eliminating 40% of manual reporting workload and compressing discrepancy MTTD from hours to seconds. Stakeholder Collaboration & Enablement: Partnered with product managers, engineering leads, and client executives to document functional requirements, transformation rules, and scalable analytical operating models.	

Alpha Payments <i>Data & Web Analyst Intern</i>	June 2024 – September 2024 <i>Mumbai, Maharashtra</i>
Behavioral & Conversion Insights: Analyzed consumer checkout behavior and drop-off trends, translating data into actionable recommendations that yielded a 15% performance improvement in checkout conversions. Automated QA Analytics & Reporting: Built cross-browser QA reporting pipelines using Python and JavaScript, evaluating data consistency and ensuring 100% platform stability during peak transaction volumes.	

PROJECTS

Financial Markets Analytics & Decision Platform	<i>Python, SQL, Tableau, Power BI, Streamlit</i>
Developed an end-to-end decision support platform with automated ETL pipelines, exploratory data analysis models, and composite KPI scoring, achieving 63% predictive accuracy across backtests.	
Payment Infrastructure Real-Time Risk & Observability Engine	<i>Python, SQL, Power BI, Slack API, PagerDuty</i>
Architected a financial monitoring framework with statistical anomaly detection and decision strategies, reducing discrepancy detection latency from hours to seconds.	

TECHNICAL & PROFESSIONAL SKILLS

Core Competencies: Enterprise Account Analytics, Payment Gateway Optimization, Success Rate (SR) Lift, GMV Growth, Decision Management Support, Process Improvement, Risk & Anomaly Control Analytical Methods: Exploratory Data Analysis (EDA), Checkout Funnel Optimization, Ticket-Size Routing, Cohort Analysis, Statistical Anomaly Detection (Z-score), A/B Testing Data & Databases: SQL (PostgreSQL, MySQL, GCP BigQuery, CTEs, Window Functions), Python (Pandas, NumPy, SciPy), Data Reconciliation, Data Quality Validation BI & Visualization: Tableau, Power BI (DAX, Power Query), ThoughtSpot, Plotly, Streamlit, Advanced Excel (Pivot Tables, VLOOKUP, Power Query) Agile & Ecosystem: Cross-functional Stakeholder Management, Client Advisory, Agile/Scrum, Technical Documentation, GCP Fundamentals, AWS
